

KEY STAFF RESUMES

HUNTER WYLIE

President and Director of Industrial Engineering

Hunter Wylie is the President of Crow Engineering and has over 15 years of experience in the Engineering field. Hunter has a large and diverse background in manufacturing and industrial engineering design and management. He has managed engineering and execution teams of over 50 working professionals and up to 10 outside vendors of multiple engineering disciplines. Hunter's last role was the capital project management and deployment for facility upgrades going out to Apple Retail locations worldwide.

At Crow Engineering Hunter provides senior project management, specifically providing a main point of contact for the team members and clients. Hunter is responsible for setting schedules, coordinating budgets and manages all contract negotiations. Crow's clients have come to rely on Hunter for his precise attention to budgeting and scheduling therefore helping clients receive top-quality work in an efficient and affordable manner.
